
a Transverse reading
b Longitudinal reading
c Cols that concentrate or divert current in all five configurations
d Agreement between variables at the cols
Latitude of the tile centre
10°N
5°N
0°
5°S
10°S
15°S
20°S
Táchira
Huancabamba
Relative conductance of the tiles
0.25
0.50
0.75
1.00
Median of the variables
mean and extreme temperature (7)
temperature range, seasonality (4)
precipitation (8)
Share of cells with cols
Montane limit near 2000 m
longitudinal, concentrates
transverse, concentrates
longitudinal, diverts
transverse, diverts
